

## FLEX Fall 2020 - What additional professional development opportunities would you like to see?

1. Tues – Online Academic Integrity (11 faculty attendees)
  - Please continue giving us training on specific on how to use CANVAS in its fullness and best practices.
  - How do you import publishers question banks into Canvas?
  - Any sessions on ensuring academic integrity would be great--especially on the more nuanced elements incorporating more than two modalities.
2. Thurs – Accessibility and Zoom Tools (17 faculty attendees)
  - Zoom Presentation Skills, how to use the whiteboard, change mouse pointer colors/shapes, etc.
  - At the end it was above my level with the CADET software . I need to get more familiar with Camtasia.
  - I think this session, or a version with a different focus, should be offered again.
  - Good introduction, more advanced training would be appreciated.
  - Loved hearing from the students.
3. Thurs – Online Learning and Student Panel (24 faculty attendees)
  - I would like more opportunities to hear directly from students.
  - Please organize additional Student panels to give faculty members some helpful reflections. This one was organized perfectly.
4. Tues – CVC-OEI Course Design (7 faculty attendees)
  - More sessions.
5. Tues - Time Management with Online Tools (17 faculty attendees)
  - I wish we could learn more. Loved her style of information sharing.
6. Tues – Canvas Studio (11 faculty attendees)
  - More sessions on these external tools would be great!
  - I realize how much more I still can learn from CANVAS. There are many tools and I sometimes get a little overwhelmed seeing all the features.
7. Tues – Electronic Document Accessibility (9 faculty, 3 classified attendees)
  - Camtasia training
  - This session would have been better as a two-hour session. We just needed a little more session time to see a few more features for the headings and not be rushed at the end.
  - I would like to know how to make PDF files and forms accessible.
  - I would like to learn about creating tabs in Canvas.
  - Intermediate to Advanced Accessibility - Excel, more on tables.
  - A reference to someplace to review this on my own would be helpful.
8. Tues – Advanced Canvas (14 faculty, 1 classified attendees)
  - More sessions with advanced canvas tools would be great!
  - Add new MS Office training.

- I'm planning on making my own videos and audio files to upload to canvas. More info on that would be nice.
- I need help with syncing Pearson's MyMathLab to Canvas.
- How to improve the Quiz development and importing into Canvas. I'm using OEI ebooks so I need to create my own quizzes and the process is time consuming and respondus seems to be painful.
- I would love for her to host a part 2 of advanced canvas skills!
