

Ventura College Response to Oxnard College Proposal for District Reserve Funds

Executive Summary

At the 9/3/2021 meeting of the VCCCD Consultation Council, Oxnard College President Luis Sanchez presented a proposal for Oxnard College to receive a special allocation of \$1.5 million from District reserves. The proposal was not formally on the agenda and was provided to Consultation Council less than an hour prior to the meeting. Funds for the proposal would be used to offer 100 additional class sections over a period of three years, and to rent space in the El Rio area of Oxnard for the purpose of opening a new satellite location.

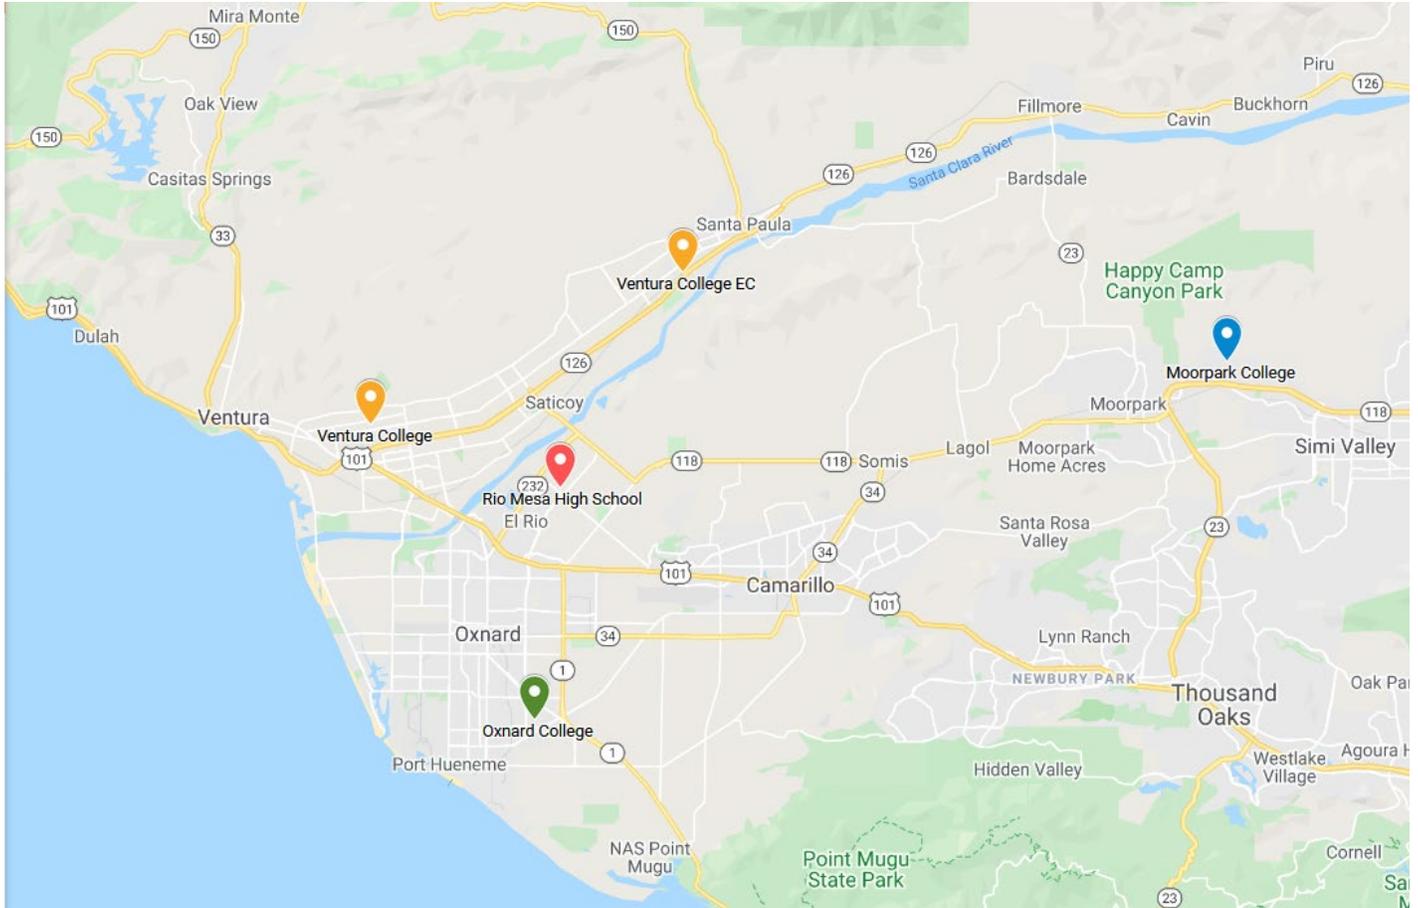

Ventura College **opposes this plan** for the following reasons:

1. The proposal's **assertions are not data informed** and appear to be based on anecdotal evidence. Given that a new satellite campus would have a significant and ongoing impact to district operations and resource allocation, it is concerning that the proposal lacks any extensive data analysis.
2. The **proposal has not been vetted** at any level of rigor, nor was it reviewed by any participatory governance committee. If the Board of Trustees were to vote on this proposal without it going through the established participatory governance process, the colleges would be in violation of a number of ACCJC Accreditation Standards. These Standards require that the Board operate at a broad policy level, and that multi-college districts adhere to their documented policies for planning and resource allocation. The relevant ACCJC Standards are IV.C.4, IV.C.7, IV.C.12, IV.D.3, IV.D.5, and IV.D.6.
3. The proposal would **circumvent the district's established budget allocation model**. This model has recently been revised to align with the State of California's Student Centered Funding Formula, and it now provides colleges with funding based on specific equity metrics.
4. The location of the proposed satellite, **El Rio, is in an area that is already well served by the VCCCD**. In fall 2021, Rio Mesa High School was the 4th highest-enrolling feeder school in the VCCCD. Further, the El Rio zip code (i.e. 93036) was the 4th highest enrolling zip code in the district.
5. The majority of students from **Rio Mesa High School and the 93036 zip code choose to enroll at Ventura College**. Thus, an Oxnard College satellite location in this area would likely only **shift enrollments from Ventura College to Oxnard College**. This would benefit Oxnard College, but not the District as a whole. Further, this does not seem to be a compelling reason for the district to expend over a million dollars and enter into a lease agreement to rent new space at a satellite location. **Additional and ongoing costs** would also be associated with a satellite location to replicate campus services as required for ACCJC accreditation
6. As our district has adapted to the Covid-19 pandemic, student preferences have shifted away from in-person classes and towards online classes. A recent survey found that after the Covid-19 pandemic is over, only 31% of Oxnard College students plan to only take in-person classes. The highest preference was for a mix of online and in-person classes. Thus, opening a new physical location does not appear to be a fruitful strategy to grow district enrollment.
7. An analysis of student demand data indicates that the **"high-demand, transfer-track" classes** that Oxnard College proposes to expand are classes that **are in high demand at all three colleges in the district**. In many cases, student demand for these classes is lower at Oxnard College than it is at Moorpark College or Ventura College.

For these reasons, it is the view of Ventura College that this proposal should not be supported. The Office of Institutional Effectiveness at Ventura College has conducted an analysis of relevant geographic and student demand metrics, which can be found on the following pages that support the college's stance.

Relevant Geographic Area

Rio Mesa High School and the El Rio area are located in the area north of Highway 101 and south of Highway 118, as shown in the map below.

Rio Mesa High School is approximately 8 miles away from Oxnard College, and 9 miles away from Ventura College. In terms of driving time, it takes slightly less time to drive from Rio Mesa High School to Ventura College or the Ventura College East Campus than it does to drive to Oxnard College.

Driving Distance and Time from Rio Mesa High School to Each VCCCD Campus

	Driving Distance	Driving Time
Oxnard College	7.9 miles	12-22 minutes
Ventura College Main Campus	8.9 miles	12-20 minutes
Ventura College East Campus	9.6 miles	12-18 minutes
Moorpark College	20.5 miles	28-45 minutes

Driving Distance and Driving Time were obtained from Google Maps using an estimated departure time of 8:00am on Monday, September 13th, 2021.

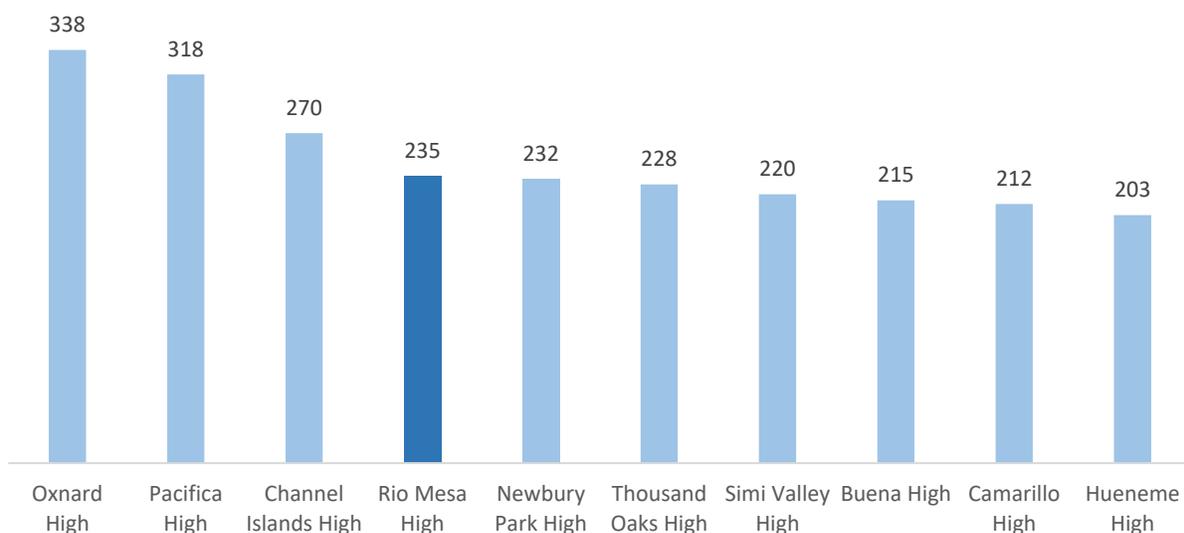

Rio Mesa High School and El Rio Area Enrollment

Rio Mesa High School and the El Rio area are both well-served by the VCCCD. In fall 2021, Rio Mesa High School ranked 4th out of all high schools in the number of first-time students it sent to the VCCCD. Further, the zip code which contains Rio Mesa High School and the El Rio area (i.e. 93036) was the 4th highest enrolling zip code in the VCCCD. This data does not appear to justify a need for a new satellite location in this area.

Fall 2021 **First-Time** Credit VCCCD Students
by High School

Rank	High School	Students
1	Oxnard High	338
2	Pacifica High	318
3	Channel Islands High	270

- Student zip code is based on the Banner hierarchical zip code.
- Data were pulled on 9/16/2021 and will likely vary slightly from final semester-end numbers.

Rio Mesa High School and El Rio Area Enrollment by College

Over the last 10 fall semesters, the majority of VCCCD students who attended Rio Mesa High School or who live in the 93036 zip code chose to enroll at Ventura College. Taken together with the data above that demonstrate how well-served this area is by the VCCCD, it appears unlikely that the district would gain many additional students with a new satellite location. Rather, students would be shifted from Ventura College to Oxnard College. From a district point of view, this does not appear to be a compelling reason to expend over a million dollars and enter into a lease agreement to rent a new space.

First-Time Credit VCCCD Students from Rio Mesa High School

All Credit VCCCD Students from Rio Mesa High School

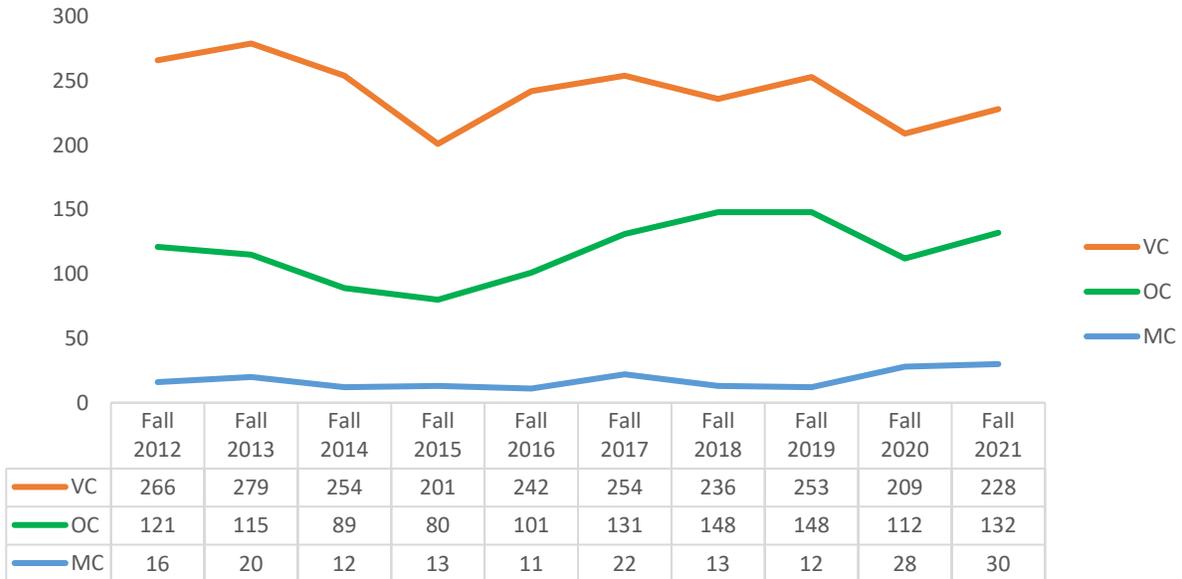

Data Notes

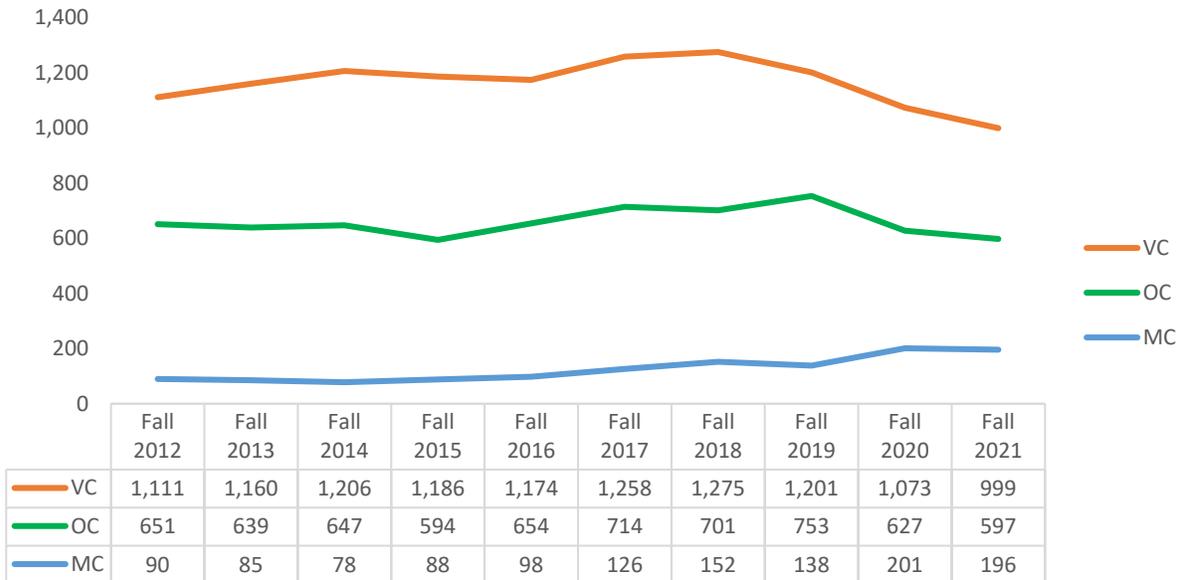

- Students = unduplicated count of students who took at least one credit class at a given campus in fall 2021. Students may have taken classes at more than one campus. Thus, the total of the college values will be higher than the unduplicated number of VCCCD students in the graphs and tables on pages 5-6.

- High school is reported by students on their CCC Apply Application.
- Data were pulled on 9/16/2021 and will likely vary slightly from final semester-end numbers.

First-Time Credit VCCCD Students from 93036 Zip Code

All Credit VCCCD Students from 93036 Zip Code

Data Notes

- Students = unduplicated count of students who took at least one credit class at a given campus in fall 2021. Students may have taken classes at more than one campus. Thus, the total of the college values will be higher than the unduplicated number of VCCCD students in the graphs and tables on pages 5-6.
- Student zip code is based on the Banner hierarchical zip code.
- Data were pulled on 9/16/2021 and will likely vary slightly from final semester-end numbers.

The Covid-19 pandemic has resulted in an enrollment decline at all three district colleges. However, this decline has been the most pronounced at Oxnard College and Ventura College. Given the data above, it seems likely that shifting enrollments from Ventura College to Oxnard College would not be a productive use of district reserve funds.

Credit Student Headcount

	Fall 2019	Fall 2020	Fall 2021	Fall 19 to Fall 21 % Change
Moorpark College	14,460	14,443	13,101	-9.4%
Oxnard College	7,641	7,022	6,538	-14.4%
Ventura College	12,897	11,950	11,051	-14.3%

Student Demand for In-Person Classes

The Covid-19 pandemic required the VCCCD to dramatically change how it offered classes. Over the last year and a half, the vast majority of courses have been offered online. In fall 2021, the district increased the number of in-person class offerings. However, fill rates in in-person classes were far lower than those in online and hybrid classes.

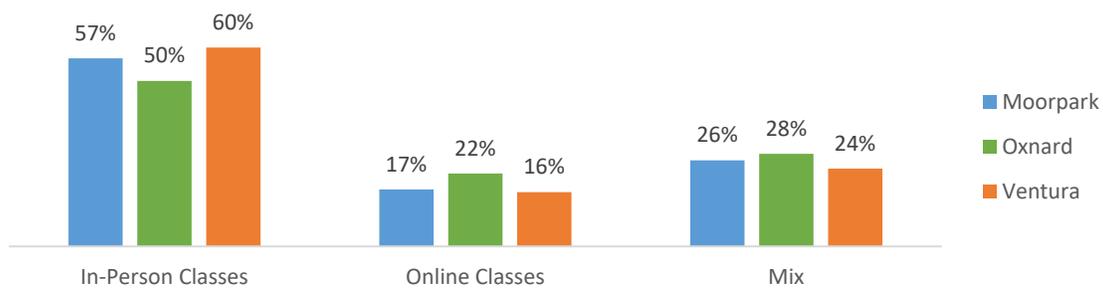

Fall 2021 Course Fill Rates by Method of Instruction

	In-Person	Hybrid	Online
Moorpark College	63.8%	72.5%	83.4%
Oxnard College	76.5%	80.9%	83.5%
Ventura College	65.5%	76.7%	84.1%
VCCCD	66.4%	76.6%	83.6%

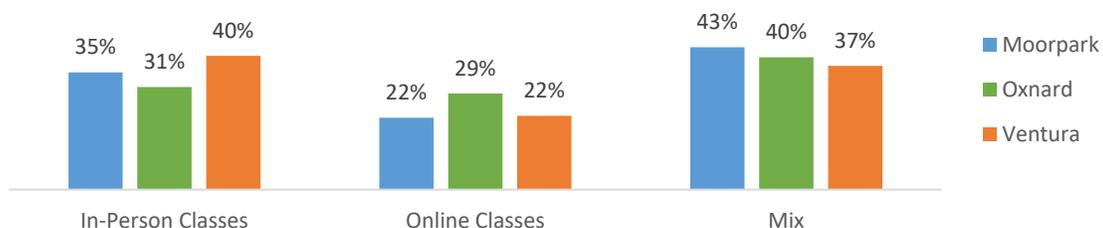

Fill Rate = Census Enrollment / Maximum Enrollment

A recent survey found that student preferences have shifted towards online courses. Even when the pandemic is over, less than 40% of students believe they will take a fully in-person schedule.

Before the Covid-19 pandemic, I preferred:

When we get back to normal after the pandemic, I think I will prefer:

Thus, the pandemic has led to a decreased demand for in-person classes, and an increased demand for online classes. Given the student survey results above, we can expect this trend to continue even after the pandemic is over. Thus, opening a new satellite location to offer more in-person classes would not be a productive use of district funds.

Student Demand for Courses in Oxnard Proposal

The “high-demand, transfer-track” classes that Oxnard College proposes to expand are in high demand at all three colleges. In many cases, student demand for these classes is lower at Oxnard College than it is at Moorpark College or Ventura College. Thus, the data do not justify a need for the district to provide a special dispensation of funds solely to Oxnard College. The specific courses identified in the Oxnard College proposal are below.

General Human Anatomy	College Composition
General Human Physiology	Critical Thinking & Composition
Elementary Chemistry	Public Speaking
General Biology + Lab	Intro to Psychology
Introductory Statistics	Intro to Business
College Algebra	Microbiology + Lab

Fill rates in the above courses were analyzed across the three colleges in the district. In a few cases, these courses are offered differently at each college. For example, General Biology Lecture and General Biology Lab are offered as two separate courses at OC and VC, but as a single combined course at MC.

Course	OC	MC	VC
General Human Anatomy	ANAT R101	ANAT M01	ANAT V01
General Human Physiology	PHSO R101	PHSO M01	PHSO V01
Elementary Chemistry	CHEM R110	CHEM M01A	CHEM V20 + CHEM V20L
General Biology + Lab	BIOL R101 + BIOL R101L	BIOL M01	BIOL V01 + BIOL V01L
Introductory Statistics	MATH R105	MATH M5	MATH V44
College Algebra	MATH R115	MATH M05	MATH V04
College Composition	ENGL R101	ENGL M01A	ENGL V01A
Critical Thinking & Composition	ENGL R102	ENGL M01C	ENGL V01B
Public Speaking	COMM R101	COMM M01	COMM V01
Intro to Psychology	PSY R101	PSY M01	PSY V01
Intro to Business	BUS R120	BUS M30	BUS V30
Microbiology + Lab	MICR R100 + MICR R100L	MICR M01	MICR V01

Conclusion

In sum, it is the view of Ventura College that this proposal should not be funded. It was based predominantly on anecdotal information. When a systematic data analysis was applied, its claims and assertions were not supported. Further, it appears likely that this proposal will significantly impact Ventura college negatively by reducing student enrollment. It circumvented the district's established budget allocation model and participatory governance processes and places the colleges at a risk of violating a number of ACCJC Accreditation Standards.
