UNIVERSAL DESIGN FOR LEARNING AND IDEA A GUEST SPEAKER

Facilitator: Dr. Matthew Oaks, Professor English at Rock Valley College and National Faculty Member of CAST

This 75-minute virtual session will introduce educators to Universal Design for Learning (UDL) -a research-based educational framework that improves engagement and learning outcomes for all learners by focusing on building flexibility into the curriculum from the outset in order to avoid time-consuming retrofitting after the fact. Increasingly, diversity, equity and inclusion (DEI) efforts are considering accessibility as a core component of achieving more equitable outcomes by creating more inclusive learning and working environments that work for everyone. Some have even started to refer to these efforts as DEI and A initiatives. We at CAST applaud these efforts, as accessibility is also a foundational component of Universal Design for Learning. UDL builds on accessibility to create environments where the variability and diversity of all learners is celebrated and supported through flexible designs that reduce barriers and empower all learners to achieve their full potential. Participants will identify ways their current DEI practices align with UDL strategies and learn tangible methods they can apply to their classroom and/or work immediately in order to support more inclusive DEI and A practices.

This session will build on those concepts as we discover additional ways to strengthen our RSI habits to generate inclusive, equitable, and accessible learning environments for our students.

Outcomes

By the end of this workshop, faculty teaching online classes in Fall 2022 will be able to:

- Prepare their online sections for ACCJC Accreditation
- Develop course content that ensures Regular and Substantive Interaction throughout the Term
- Collaborate with colleagues to brainstorm RSI best practices and implementation

Note: This workshop builds upon the material presented in the RSI Workshops offered throughout the summer and on Tuesday, August 9th. Those who participated in the RSI Workshop previously will most benefit from this session.
