Biotechnology

Biotechnology Degree and Certificates

In the Health & Wellness Pathway, your future. Health & Wellness Pathway knowledge and skills for a rewarding career. Health & Wellness Pathways will continue to create skilled workers who embrace creativity, gain work experience, develop problem-solving skills, and experience learned in the Health & Wellness Pathway. We are committed to being culturally and socially responsible. Students who want to enter the workforce can continue their education through transfer.

If you enjoy science, math, technology, and a career path will impact society, then you are in the right place. Our curriculum emphasizes collaboration, rigor, and critical thinking to provide a rich learning experience.

About Program

Biotechnology is a rapidly growing industry

Biotechnology is a rapidly growing industry with projections for continued growth and exciting opportunities for employment. The Biotechnology Program at Moorpark College is one of several in the State with a comprehensive curriculum in bio-manufacturing. This program is designed in consultation with members of local industry (Amgen, Takeda, Thermo Fisher Scientific and others) to provide the essential technical experiences and training needed for this thriving field. The curriculum balances basic science courses with practical laboratory applications.

Majors offered in the Business, Information Technology, and Health & Wellness Pathways are career bound as well as to further education. The program provides technical, interpersonal, communication, and critical thinking skills. Students will have an opportunity to gain work experience through internships and externships. The program is designed to prepare students for the current and future economy, and will be prepared to join the workforce or continue their education through transfer.
