About Program

The Mathematics Department offers basic skills and transfer level courses in Mathematics. A number of Department courses apply toward the Mathematics competency for graduation. Mathematics courses are fundamental preparation for a wide range of majors, including business, computer science, physical and life sciences, and social and behavioral sciences among others.

In addition, the Department offers a Mathematics Degree program with courses in pure and applied mathematics. An Associate's degree in Mathematics can lead to careers in research, business, industry, and government. Many areas, such as the physical and social sciences, engineering, economics, and business, are dependent upon the use of applied mathematics in developing solutions to practical problems.

If you enjoy science, math, technology, and applied mathematics, your career path will impact society, through collaboration, rigor, and critical thinking.

Student Code of Conduct

^

The purpose of these standards is to ensure a safe, respectful and productive learning environment for VC students, staff, faculty and administrators. In order for the colleges and the district to fulfill their mission of student learning achievement, all employees must feel secure in their work setting. Student conduct that negatively impacts the ability of students to meet their educational goals or employees to carry out their professional job responsibilities will be subject to the terms of this procedure.

Definitions: The following conduct shall constitute good cause for discipline, including but not limited to removal, suspension or expulsion of a student.

The procedures shall be made widely available to students through the [college catalog](http://vcccd-moorpark.production-preview.com/apply-and-enroll/college-catalog) (<http://vcccd-moorpark.production-preview.com/apply-and-enroll/college-catalog>), and other means. Students who violate any of the following standards for student conduct while at the district office, on the college campus or during off-campus college-sponsored activities are subject to the procedures outlined in Administrative Procedure 5520: Student Discipline Procedures.

Academic Dishonesty

^

Moorpark College takes academic honesty very seriously. Instructors, accordingly, have the responsibility and authority for dealing with instances of cheating or plagiarism that may occur in their classes. Such activities could include stealing tests, using "cheat sheets," using unauthorized technology, copying off another's test, or turning in someone else's work as his/her own. Instructors have the responsibility to report instances of plagiarism or cheating to the Dean of Student Life. Academic dishonesty, in any form, is a violation of the Moorpark College **Student Code of Conduct** (<http://vcccd-moorpark.production->

[preview.com/node/2507](https://www.moorparkcollege.edu/preview.com/node/2507)) as outlined in the Student Rights and Responsibilities section and, as such, is subject to investigation, charges of misconduct, and disciplinary consequences.

Attendance Policy

Academic Policies : Attendance

All students, both registered and on the waitlist, are expected to attend the first class meeting. Instructors are required to drop all registered and waitlisted students who do not attend the first day of class and those who quit attending prior to the census date for each class. They may, but are not required to, drop registered students who quit attending after census but before the final drop deadline for each class. Students are responsible for dropping their classes and withdrawing from the college, and should initiate the drop themselves.

All students admitted to the colleges of the Ventura County Community College District are expected to attend classes regularly, both because continuity of attendance is necessary to both individual and group progress in any class, and because financial support of the college is dependent upon student attendance. Absence for any reason does not relieve the student from the responsibility of completing all class requirements.

It is also the responsibility of students, at the beginning of the semester, to become aware of the attendance and absence policies of the instructor for each class in which they are enrolled. When a student's absence exceeds in number 1/9 of the total class contact hours for the session (e.g., absence from a semester-long class equal to twice the number of hours the class meets in one week), the instructor may drop such student from the class and record a grade in accordance with the policy for dropping a course.
