Moorpark College	27 - PERFORMING ARTS	Main Floor	100 - Black Box Theater	14218-121909	<p>The doors leading into PA-100 are not closing properly. If you enter the theater from the hallway doors closest to the dance studio, the next set of double doors won't close.</p> <p>I attached two photos of the area. There is a triangular piece that usually recedes into the door frame when the door closes but it is sticking out at the moment. The door can't close completely and we hope you will be able to fix it.</p> <p>I'm not sure if it possible to rush this request since we have performances scheduled to start Thurs. 7/22, but if it could be done as soon as possible that would be great. Because the door is not fully closing it is letting in light and sound from the hallway which makes a not ideal performance situation.</p> <p>Thanks! Ariana Burrell</p>

Moorpark College	50 - HEALTH SCIENCE CENTER	Floor 1	146 - Restroom, Women's	20143-124205	Per Professor Christina Lee, may I please have the water pressure of the bathroom sinks checked? All of the women's bathroom sinks, except for the one closest to the door, spray really hard. The water bounces off of people's dirty or soapy hands, and splashes all over such as on to the handwasher's body and face and the body and face of the person using the sink next to them. My glasses have gotten splattered, meaning eye exposure is happening to those without glasses. I don't recall the water pressure being this high on those sinks last semester. I'm concerned this is an infection control and safety issue. Thank you,

					<p>two racks plus the four that have fallen apart in M-109 (see image).</p> <p>(Copied request by Brandon Elliott) Last year, we received brand new music stands and submitted a work order to have them assembled. However, now that they are being used, we quickly discovered they were not assembled correctly.</p> <p>Sadly, this means they all need to be taken apart and reassembled. It looks like they used the screws to simply tighten the closure from the music stand portion to the pole portion. However, the screen is supposed to go through the closure through the two holes on the pole so that the two parts stay together securely. Currently the top portions of the stands are popping off as students adjust them.</p> <p>I've attached a link to the assembly instructions: https://www.wengercorp.com/Lit/Wenger_Music%20Stands_Assembly-Owners_237A113.pdf</p> <p>I believe page 5 and 6 is where the directions were not followed, causing the stands to fall apart.</p> <p>Brandon Elliott, Ed.D. Moorpark College	6 - PHYSICAL SCIENCE	Floor 2	230 - Office	14209-126977	<p>Per Jim Artero, troubleshoot and adjust the fluorescent lighting in Faculty Office PS-230 (temporary office of Ms. Melissa Johnson). The issue is that the lighting is too "yellowish," and installing new white fluorescent tubes would help a lot. Also, the overhead lighting panel buzzes. It could be that the ballast is starting to fail. (2021-09-24 10:50)</p> <p>Melissa Johnson reports someone very kindly upgraded the lights in PS 230 to white (rather than yellow). However, there is still a noise coming out of the ceiling. I don't think that it's coming from the lights, but rather from the ventilation system. It's strange ... almost like a crinkly noise. I'm not sure if this is normal? (2021-09-27 16:45)</p>
