## MOORPARK COLLEGE

### PROGRAM PLANNING

Welcome to Program Planning and Nuventive Impact (ActionPoint)!  
Improve (formerly known as TracDat), Tableau, and Sharepoint are now combined into one view for your convenience.

### INSTRUCTIONS

1. Click on a Strategic Direction (to the left).
2. Select the applicable Program Plan from the right (you may have only one area of responsibility).
3. Review the questions given to you by the Vice President.
4. Analyze the various Tableau visualizations and formulate a response.
5. You only need to complete at least one Strategic Direction and focus on answering all four questions (though all CTE programs must address Strategic Direction 3).
6. Program planning provides an opportunity for you to reflect on your goals from the past year, review your data, and to define your goals for next year. How can the College support your activities?

7. Click on the green plus sign (to the right) to begin typing a response into the Nuventive Impact fields.

NOTE: Due to technical limitations, please keep your responses brief. Otherwise, responses may be cut-off when printing for prioritization.

8. Click the yellow Save button once finished.

### SAMPLES

Please click below to view samples of strong Program Plans:
