CCC Technology Center Highlights

We offer dedicated support to see colleges through to successful implementation, configuration, and adoption of systemwide technology solutions, including professional development and ongoing customer service.

In our 25-year history of collaboration with the California Community Colleges Chancellor's Office and community colleges statewide, the experience, vision, and execution of the CCC Technology Center have resulted in great strides forward for the system in areas like federated identity, application architecture, networking, and student services.

For more information about any of the products, please send an email to crms@ccctechcenter.org.

Here's What People are Saying

"The Tech Center has been a great partner not only providing solutions but listening to the needs of security professionals in the community college system to help modify services or look for new solutions to maintain cyber hygiene throughout the system."

— Dan Rojas, Information Systems Security Officer at Santa Monica College

January 2022

"The CCC Accessibility Center is providing so much good material for faculty and staff learning how to make materials accessible. With the pandemic, my job has gotten so much more challenging, and it seems like the Accessibility Center is stepping along with us and helping us figure out some of these hard things."

— Corrine Haverinen, Instructional Accessibility Specialist at Santa Rosa Junior College
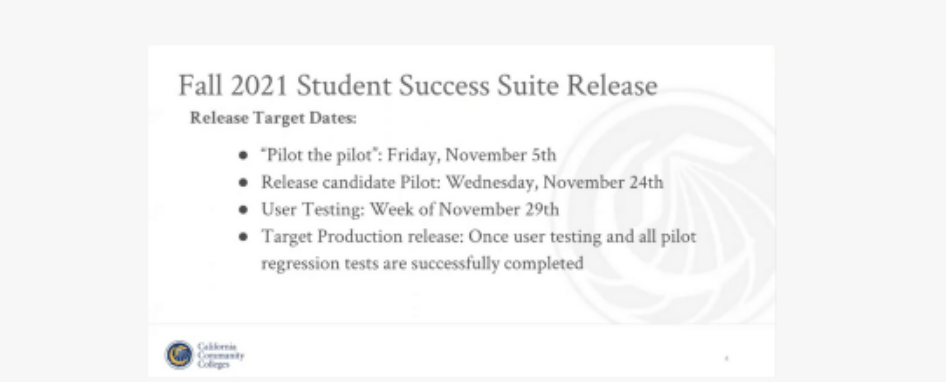

January 2022

"In spring, the Student Services department at Copper Mountain College set out on a mission to provide relentless clarity for students regarding all of our processes from application to graduation. As part of this pursuit, we decided to bring CCC MyPath to CMC. As an administrator who works on several technology projects, the MyPath project was my favorite. It was very easy to use and is a great tool to connect students with their next steps immediately after applying to our school. The CCC Technology Center team was great to work with and always available if we had questions."

— Jenn O'Donnell, Dean of Student Services, Copper Mountain College

CCC MyPath implementation, 2020

"The new design is now fully accessible to screen readers and other assistive technologies, is mobile-friendly and supports our Spanish-speaking students."

— Patricia Donohue, Student Success Suite Product Documentation and Communications
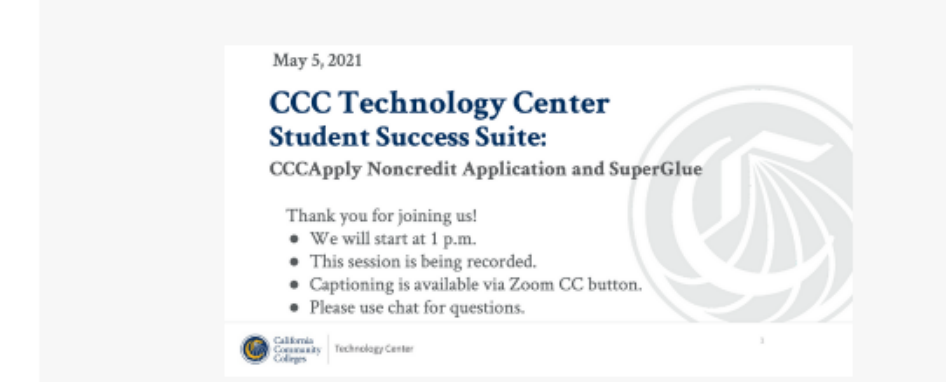

OpenCCC, CCCApply Redesign, May 2020
