Discipline (CB01A) MATH - Mathematics

Course Number (CB01B) M911S

Course Title (CB02) Support for College Algebra for Liberal Arts

Banner/Short Title Support - Col Alg for Lib Arts

Credit Type Noncredit

Start Term Fall 2023

Catalog Course Description

Reviews topics necessary for success in College Algebra for Liberal Arts, including linear equations and inequalities, graphing, factoring, and rational expressions. Covers systems of linear equations, rational functions, rational exponents and radicals, complex numbers, quadratic equations, graphs of parabolas, functions, composition and inverse functions, exponential and logarithmic functions.

Additional Catalog Notes

This course requires concurrent enrollment in MATH M11.

Taxonomy of Programs (TOP) Code (CB03) 1702.00 - Mathematics Skills

Course Credit Status (CB04) N (Noncredit)

Course Transfer Status (CB05) (select one only) C (Not transferable)

Course Basic Skills Status (CB08) B - The Course is a Basic Skills Course SAM Priority Code (CB09) E - Non-Occupational

Course Cooperative Work Experience Education Status (CB10) N - Is Not Part of a Cooperative Work Experience Education Program

Course Classification Status (CB11) L - Non-Enhanced Funding

Educational Assistance Class Instruction (Approved Special Class) (CB13) N - The Course is Not an Approved Special Class

Course Prior to Transfer Level (CB21) Y - Not Applicable

Course Noncredit Category (CB22) C - Elementary and Secondary Basic Skills

Funding Agency Category (CB23) Y - Not Applicable (Funding Not Used)

Course Program Status (CB24) 1 - Program Applicable

General Education Status (CB25) Y - Not Applicable

Support Course Status (CB26) S - Course is a support course

Special Characteristics Code Descriptor LA - Learning Assistance (a form of supplemental instruction)

Field trips Will not be required

Grading method (P) Pass/No Pass Grading

Does this course require an instructional materials fee? No

Repeatable for Credit

Yes Number of times a student may enroll in this course Unlimited

Maximum units a student may earn in this course 0

Units and Hours

Carnegie Unit Override No

Total in-Class (full semester or term) Total Minimum Contact/In-Class Hours (for full semester or term; not weekly) 35 Total Maximum Contact/In-Class Hours (for full semester or term; not weekly) 35

Total Student Learning

Total Student Learning Total Minimum Student Learning Hours 35 Total Maximum Student Learning Hours 35

Corequisites MATH M11 - College Algebra for Liberal Arts

Requisite Justification Requisite Type

Corequisite

Requisite MATH M11 - College Algebra for Liberal Arts

Requisite Description Other (specify)

Specify Other Requisite Description

The support course is intended to offer review material in support of the topics covered in the College Algebra for Liberal Arts course.

Level of Scrutiny/Justification

Content review

Student Learning Outcomes (CSLOs)				
	Upon satisfactory completion of the course, students will be able to:			
1	graph a line in the coordinate plane, and identify the slope and intercepts of the line.			
2	compare and contrast methods of solution to mathematical problems, such as solving quadratic equations by more than one method.			
3	simplify a radical expression and identify its domain in the real numbers.			
Course Objectives				
	Upon satisfactory completion of the course, students will be able to:			
1	graph linear equations and test whether two lines are parallel perpendicular or peither			

1	graph linear equations and test whether two lines are parallel, perpendicular, or neither.
2	write the equation of a line in point-slope form, slope-intercept form, and standard form.
3	factor basic polynomials.
4	evaluate polynomial functions and solve polynomial equations by factoring and using the zero factor property.
5	simplify rational expressions, perform operations with rational expressions, simplify complex fractions, and determine the domain of a simple rational function.
6	divide by a polynomial using long division and synthetic division.
7	solve equations containing rational expressions.
8	simplify rational exponent expressions using the properties of exponents and convert to radical notation.
9	put radical expressions into simplest form, perform operations with radicals, solve equations containing radical expressions, and determine domain of a simple radical function.
10	add, subtract, multiply and divide complex numbers.
11	solve quadratic equations by each of the following methods where applicable: factoring, the square root method, completing the square, and the quadratic formula.
12	solve non-linear inequalities in one variable.
13	describe the relationship between a function and its inverse geometrically and algebraically.

14 use geometric formulas to solve problems involve	ing perimeter, circumference, and area.
---	---

15 set up a proportion, simplify ratios and solve equations involving percents, including applications.

Course Content

Lecture/Course Content

- 10% A. Equations, Inequalities, and Problem Solving
 - 1. Linear equations and their applications in one variable
- 2. Formulas and literal equations

15% B. Graphs and Functions

- 1. Introduction to linear and non-linear functions
- 2. Review of graphs of linear equations and slope
- 3. Equations of linear functions

25% C. Integer Exponents, Polynomials, and Polynomial Functions

- 1. Review of integer exponents, rules of exponents
- 2. Review of polynomials and operations on polynomials
- 3. Review of factoring
- 4. Solving polynomial equations by factoring
- 5. Evaluate polynomial functions

20% D. Rational Expressions

- 1. Simplifying, adding, subtracting, multiplying, and dividing rational expressions
- 2. Simplifying complex fractions
- 3. Dividing polynomials using long division and synthetic division
- 4. Solving rational equations

20% E. Radicals, Rational Exponents, and Complex Numbers

- 1. Radicals and radical functions
- 2. Simplifying, adding, subtracting, and multiplying radical expressions
- 3. Dividing radical expressions and rationalizing denominators
- 4. Complex numbers

10% F. Quadratic Equations and Functions

- 1. Solving quadratic equations by the square root method, completing the square and the quadratic formula
- 2. Non-linear inequalities

Methods of Evaluation

Which of these methods will students use to demonstrate proficiency in the subject matter of this course? (Check all that apply):

Problem solving exercises Skills demonstrations

Methods of Evaluation may include, but are not limited to, the following typical classroom assessment techniques/required assignments (check as many as are deemed appropriate):

Skills demonstrations Other (specify)

Other

Classroom discussions and student participation.

Instructional Methodology

Specify the methods of instruction that may be employed in this course

Class activities Class discussions Distance Education Group discussions Instructor-guided interpretation and analysis Instructor-guided use of technology Lecture Small group activities

Describe specific examples of the methods the instructor will use:

- Engage students in group activities, whereby students demonstrate the graphing of basic functions, including lines.
- · Instructor demonstration of the rules of exponents in simplifying expressions involving powers.
- · Classroom discussion on the proper ways to simplify rational expressions.

Representative Course Assignments

Writing Assignments

- 1. Homework problems where answers require a written explanation of the solution, such as solving a system of linear equations and identifying if the system is consistent or inconsistent, dependent or independent.
- 2. Graded assignments: in-class and/or homework assignments, such as factoring a trinomial whose leading coefficient is not equal to 1 requiring complete solutions using both written English and symbolic mathematical language.

Critical Thinking Assignments

- 1. Apply analytic techniques for solving mathematical and application problems, such as finding the inverse of a one-to-one function.
- 2. Describe and apply the algorithmic steps for obtaining the solution to a mathematical problem, such as solving logarithmic equations.
- Compare and contrast methods of solution to mathematical problems, such as solving quadratic equations by more than one method.

Reading Assignments

- 1. Viewing various diagrams in a textbook that show visual images of the graphs of linear functions and quadratic functions.
- 2. Reading mathematical content in a textbook, such as factoring formulas for squares, different of squares, or sums and differences of cubes.

Skills Demonstrations

- 1. Demonstrate the solution to a quadratic equation by choosing the correct method from among graphing, completing the square, factoring, or using the quadratic formula.
- 2. Demonstrate the simplification of a rational expression by performing long division.

Problem-Solving and Other Assignments (if applicable)

- 1. Problem-solving exercises using geometric formulas to solve for perimeter, circumference, and area.
- 2. Problem-solving exercises with radical expressions.

Outside Assignments

Representative Outside Assignments

- 1. Group or individual projects which require student collaboration including written mathematical answers on paper or on the board.
- 2. Graded assignments: in-class and/or homework assignments requiring complete solutions using both written English and symbolic mathematical language.
- 3. Additional problem sets provided by the instructor, such as practice exercises on simplifying expressions.

Example of Assignments Requiring Library Resources

Explore science books for examples of natural and architectural structures that exhibit common graphs of curves.

Distance Education Addendum

Definitions

Distance Education Modalities

Hybrid (1%–50% online) Hybrid (51%–99% online) 100% online

Faculty Certifications

Faculty assigned to teach Hybrid or Fully Online sections of this course will receive training in how to satisfy the Federal and state regulations governing regular effective/substantive contact for distance education. The training will include common elements in the district-supported learning management system (LMS), online teaching methods, regular effective/substantive contact, and best practices.

Yes

Faculty assigned to teach Hybrid or Fully Online sections of this course will meet with the EAC Alternate Media Specialist to ensure that the course content meets the required Federal and state accessibility standards for access by students with disabilities. Common areas for discussion include accessibility of PDF files, images, captioning of videos, Power Point presentations, math and scientific notation, and ensuring the use of style mark-up in Word documents.

Yes

Regular Effective/Substantive Contact

Hybrid (1%-50% online) Modality:

Method of Instruction	Document typical activities or assignments for each method of instruction	
Asynchronous Dialog (e.g., discussion board)	Use of student discussion boards to discuss concepts from the material, solutions to homework problems, general discussion of techniques in solving problems, study skills, or arranging study groups.	
E-mail	Responding to student queries about material, grade information, course policies and procedures, scheduling and due dates, submitting homework assignments, or making general announcements to the class.	
Face to Face (by student request; cannot be required)	Students requesting to speak to instructor in person for personal help on material, grade information, or discussion of policies and procedures.	
Other DE (e.g., recorded lectures)	Posting of recorded lectures either by the instructor, recorded lessons available through campus resources, or use of public online resources available on the internet.	
Synchronous Dialog (e.g., online chat)	Active live discussion with the instructor on material concepts, techniques for problem solving, feedback on solutions to problems, general chat on study skills, or answers to homework problems, quizzes or tests.
